How to use the charging cradle

The charging cradle is the primary way to keep your GrandPad powered and ready for use. Choose a location that is in reach regularly. We suggest placing it beside your favorite comfy chair or bedside table.

STEP 1 POWER UP THE CRADLE

Plug the charging cradle into a standard 120-volt wall outlet

A small green light will appear on the left side of the charger indicating that the power is on.

STEP 2 KEEP YOUR GRANDPAD CHARGED WIRELESSLY

Place your GrandPad on the charging cradle facing forward (as shown) and it will automatically start charging

- A white light turns on to verify the charge.
- The device will charge with the protective cover closed (as shown) or flipped open.

Place your GrandPad on the charging cradle every night—in the morning it will be fully charged.

An 8-foot long power cord is attached to the charging cradle.

DISPLAY A PHOTO SLIDESHOW FOR ALL TO SEE As your GrandPad is charging, keep the protective cover open, and after some time a slideshow of all your photos will play automatically.
